

*Trend pushrods, wrist pins, and lifters satisfy the exacting demands of top teams including: Hendrick Motorsports, Joe Gibbs Racing, KB Racing, J&J Racing, Sprint Cup Teams and many more.*

**Championship Winning!**

## Expensive custom 7/16in pushrods replaced by affordable shelf-stock double-tapers...

*Trend has revolutionized the 7/16", 165-wall one-piece double-tapered pushrod. It is now available as a shelf-stock part at shelf-stock pricing.*

**The first of its kind**, Trend's new 7/16" pushrods have a double-taper body for extra clearance and 5/16" ball ends machined to **210 degree radius for even more clearance.**

- Available from 7.000" to 11.550" long, in increments of 0.025"
- 5/16" ball-ball ends held to tolerances plus-or-minus .001"
- Double taper provides additional clearance to cylinder heads, lifters, and lifter bores

**Pushrods in stock for immediate shipment**

*For exchanges due to incorrect length, no re-stocking charges apply, providing pushrods are unused.*

*7/16in double taper reduces to 3/8in for working clearances in cylinder heads, lifters & lifter bores*

*.100in continuous passageway to lubricate rockers*

*Tool steel bars and chrome molybdenum tubing custom-made to Trend's specifications*

**See pricing on reverse side. ---->**

### Also stocking:

**3/8in .135-wall and 5/16in .105-wall straight pushrods**

#### STANDARD FEATURES:

- 5/16" ball ends held to tolerances plus-or-minus .001"
- Available from 7.000" to 9.800" in increments of .025"
- 210° operating clearance on ball ends

*H-13 with optional 3/8in radius cup end*

### H-Series Pushrods

The H-Series pushrod is a one-piece pushrod constructed from solid H-13 tool steel. It is offered in any of the common ball/cup sizes for most applications with an unbeatable lead time.

### 4130 Chromoly Pushrods

#### STANDARD FEATURES:

- 7/16" diameter available in 0.125" and 0.165" wall thickness
- 1/2" diameter available in 0.200" wall thickness
- 9/16" diameter available in 0.187" wall thickness
- SAE 4130 Seamless tubing
- Centerless ground for precision

### Custom Pushrods

Made from 4130 seamless tubing, centerless ground and satin finished, with **Quickships** available in all quantities

- 1/2", .200" wall or 9/16", .187" wall
- 10-12 day lead time or a minor additional charge for a **Quickship** with a 24-48 hour lead time
- Quick ships available with the 9/32" bronze insert for .281" standard ball adjuster
- Optional 5/16" ball on both ends, or 3/8" ball or cup on one end with a 5/16" ball on the other. Or a 3/8" ball on both ends, or a 3/8" radius cup with a 3/8" ball. *Mutiple combinations available—please call for details.*

\* In increments of .025" except where noted. For ordering, use your desired length to replace "XXX". Ex: T625805 would equate to a 5/16", .080"-wall, 6.25" pushrod. **For lengths longer than 10", use "TT" to preface part # instead of the single "T".** \*\*Where "Standard" is indicated, no additional charges, with the exception of a single taper on the 7/16" pushrods, where double-taper is standard. New stocking pushrods highlighted in gray.

**Pushrods Stocked as Blanks**
